

A Celebration of the Mundane, Sacred, and Profane

Saints & Sinners

Human Artifacts

The items which surround our everyday existence are often taken for granted or appreciated only for their functionality.

So common, they often escape our notice, part of the cluttered landscape of our world.

In finding and rendering some of these mundane items, I have experienced a slowing and grounding of my relationship to the world around me. I often catch myself noticing the most insignificant, yet beautiful items, each a testament to the diversity of human ingenuity and manufacture.

Most are worldly, profane. Others have, for some, a magical or sacred quality that reach back to a treasured past, out to some metaphysical reality or forward to hopes for the future.
